

Infowerks Data Systems, Inc.

First in Pharmacy Data Security and Retention

Taking efficient, accurate data conversion beyond the status quo, Infowerks provides a suite of professional data services. Since 1997, we have consistently set the standard in pharmacy data security and retention.

A Legacy of "Firsts"

Founded by the conversion industry's lead software architect, Infowerks has maintained a program of systematic improvements resulting in the most efficient and secure methodology available. Simply put, we create peace of mind.

Best-In-Class Security

Infowerks pioneered the use of military-grade data security protocols, verification systems, and redundant storage protocols.

- **Secure Data Transport:** All data transport methods are encrypted and secured. Even if mailed, our proprietary Viewmaster Data Secure Archive CDRs ensure that your data assets are never compromised. The transporting and storing of converted data by any other method can leave it open to attack or theft.
- **Secure Data Retention:** We further secure your data in redundant off-site storage. As a result, your data is always available, with zero down-time.

- **Secure Beyond Compliance:** Our security policies are maintained to always exceed HIPAA regulations. This gives our clients the ultimate benefit, total confidence.

Customization, Perfected

To us, every job is a custom job. We designed a process that allows us to rapidly meet your specific requirements, to whatever extent is necessary, and deliver on time.

- **Evaluation:** We assess your current system and how you utilize it. A sample of your data is securely captured and analysed. This information allows for a complete profile of your requirements, the project cost, and delivery time.
- **Testing:** We provide test data for your evaluation, feedback, and acceptance. Early visibility gives you the advantage of a fully customized solution with absolute speed... and no surprises on your launch date.

"This project involved 66 stores and four different legacy systems. Everyone went beyond expectations in making this huge project a great success."

— Bryan Hull, Spartan Stores

- **Scheduling:** Your data is ready when you are. We work in concert with all project stakeholders to meet your schedule — for one or multiple sites.
- **Delivery:** We securely convert your data during off-hours, encrypt it, and deliver it before you go live. There is no down time for your system.

Markets Served? Yours.

Infowerks has experience with every permutation of software, hardware, and pharmacy.

Including:

- Independents
- Local, regional, national chains
- Mail order
- Hospital inpatient/outpatient
- Assisted living, long-term care

Platforms Supported

We support your legacy software, as well as your new platform. In fact, most of the popular platforms benefit from our top tier price discount. Because certain platforms are more efficient for us to manage, we share the savings.
